

Download 2.1 Bar Convert To Psi

BAR in WWII terminology stands for Browning Automatic Rifle. The official designator was M1918A1. It was a .30 caliber fully or semi-auto weapon. The above form works if you are measuring differential pressure, such as the difference in psi between two points. It also gives the correct answer for absolute pressure, assuming you are measuring psia, which is the pressure relative to absolute zero vacuum. Part #094-1218 Part# 098-1218 Two 12" x 18" multi-size Flow-Thru™ Plugs are shown: One with a 4" bypass, the other with an 8" bypass: THE MULTI-SIZE FLOW-THRUS™ are built with the same patented designs as our multi size Domehead™ plugs.
