

Download Bromo Compound

Bromo compounds are any class of organic compounds that contain a carbon-bromine bond. They are versatile compounds that find application in diverse fields. Bromo compounds are any class of organic compounds that contain a carbon-bromine bond. They are versatile compounds that find application in diverse fields. They are extensively used in organic synthesis as intermediates. Bromides, being good leaving groups, are used as substrates for substitution reactions. This makes them useful reagents, for ...Offering you a complete choice of products which include 5-bromophthalide, 1-bromo-3-chloropropane, 1-bromo-5-chloropentane, n-bromosuccinimide and 1-bromododecane. Prominent manufacturer and exporter of wide range of organic & Inorganic compounds in India. We offer the products as per the best required specifications of our valuable clients.
