This incisive text provides a basic undergraduate-level course in modern optics for students in physics, technology and engineering. The first half of the book deals with classical physical optics; the second principally with the quantum nature of light. This note will cover topics in modern physics, including electricity, magnetism, light, optics, optical instruments, and properties of atoms including relativity and quantum mechanics. books > Light and Matter. This is an introductory text intended for a one-year introductory course of the type typically taken by biology majors, or for AP Physics 1 and 2. Physics4Kids.com! This tutorial introduces light and optics in physics. Other sections include motion, heat, electricity, magnetism, and modern physics.
